Mr. Roy Osinga

Flower Turbines BV

RDM Innovatiedock, Scheepsbouwweg 8 (C5),

3089JW Rotterdam

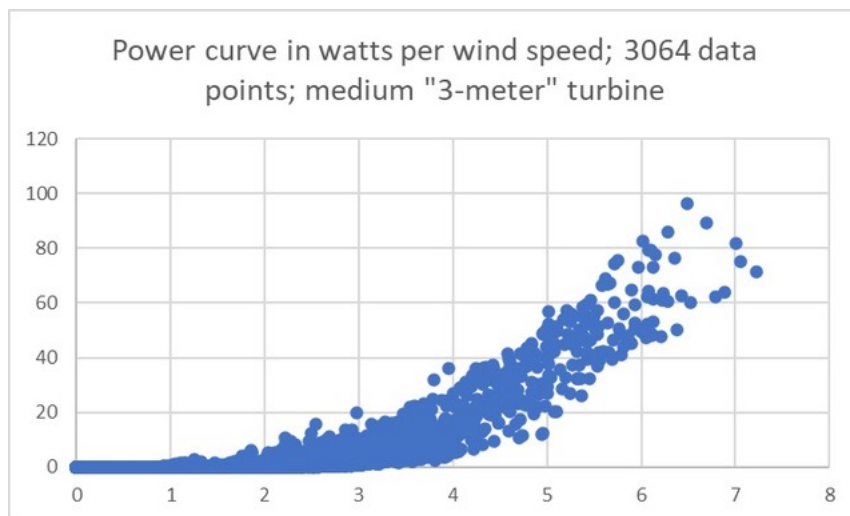

Netherlands

Date: 23 October 2021

Subject: Validation

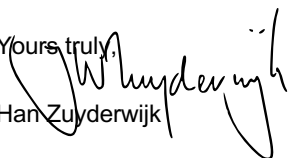

Dear Sirs,

With this letter Alura Group, validates the wind measurement data of Flower Turbines' 3 meter vertical wind turbine from the location in the Marina of Hellevoetsluis at LatLng (51.823, 4.11725). The data was collected on August 16, 2021 by electrical engineer Andrei Dita and is presented in the graph below. We have validated the data is correct and coming from the indicated location by analyzing the wind measuring devices software and log files.

The graph shows the 3064 collected data points. On the x-axis the graph shows the wind speed in meters per second

On the y-axis the graph shows the watts produced by the turbine.

Yours truly,

Han Zuyderwijk

Senior Regulatory Conformity Advisor
